

## Theodore Chang

Ph.D. (Earthquake Engineering, 2020)

M.Sc. (Distinction) (Civil and Structural Engineering, 2014)

B.Eng. (Civil Engineering, 2013)

### >\_ Contact

+49 15510720730  
 [github.com/TLCFEM](https://github.com/TLCFEM)  
 [tlcfem@gmail.com](mailto:tlcfem@gmail.com)  
 0000-0002-4911-0230

### >\_ Expertises

- numerical analysis  
static and dynamic nonlinear finite element analysis of reinforced concrete, steel structures and continuum mechanics problems, isogeometric analysis
- structural analysis and design  
design and analysis of reinforced concrete, steel and timber structures
- software engineering  
high performance computation, software development on different architectures, development of new finite element models
- applied mathematics  
linear algebra, differential equation, numerical analysis, machine learning related topics

### >\_ Work/Lecturing Experience

- 2022 – present, Research Associate Humboldt–Universität zu Berlin.
- 2020S1 – 2021S1, Lecturer University of Canterbury.
- 2019S2 – 2019S3, Lecturer UC International College.
- 2016 – 2021, Teaching Assistant (Coordinator) University of Canterbury.

### >\_ Research

#### Research Interests

constitutive models, couple stress theory, finite element formulation, structural dynamics, isogeometric analysis

#### Ph.D. Thesis

L. Zhang, Numerical analysis tools for modelling reinforced concrete shear wall buildings subjected to earthquake loading, Ph.D. thesis, University of Canterbury (2020). doi:10.26021/1833

## Books

-  C. Lee, T. Chang, Numerical evaluation of bell-shaped proportional damping model for softening structures, in: 15th World Congress on Computational Mechanics (WCCM-XV) and 8th Asian Pacific Congress on Computational Mechanics (APCOM-VIII), CIMNE, 2022. doi:10.23967/wccm-apcom.2022.083
-  T. Chang, C.-L. Lee, A. Carr, R. Dhakal, Dynamic analysis of a reinforced concrete shear wall building using a novel finite element, in: Proceedings of the 7th International Conference on Computational Methods in Structural Dynamics and Earthquake Engineering (COMPDYN 2019), Institute of Structural Analysis and Antiseismic Research School of Civil Engineering National Technical University of Athens (NTUA) Greece, 2019, pp. 4565–4575. doi:10.7712/120119.7250.18782

## >\_ Major Software Skills

Edit	LaTeX, Vim, MS Office Suite
Code	C/C++,  , Fortran, MATLAB, Go,  , 
Draw	AutoCAD
Analyse	ANSYS, ABAQUS, OpenSees, SAP2000
HPC	OpenMP, MPI, SYCL
Misc.	 , CMake,  , Visual Studio, VS Code, Qt

## >\_ Projects

-  T. L. Chang, suanPan – an open source, parallel and heterogeneous finite element analysis framework (2021). doi:10.5281/ZENODO.1285221
-  Damping Dolphin – a utility to visualise and generate parameter sets for use in the damping model
-  Alcongrator – a utility to process and visualise ground motions
-  motion-base – a web-based ground motion database
-  msglc – (de)serialize json objects with lazy/partial loading containers using msgpack
-  suanPan-manual – manual for open source FEM platform suanPan
-  structmech – a TikZ command set for structural mechanics drawings

## >\_ Referees

-  Dr. Chin-Long Lee
